~~person we need~~

1. ~~API~~ ~~mustaholsag~~
final response will be
all process terminate
& ~~URL~~
all ~~mustahol generate pdf get~~
a hit of ~~SD~~

2. ~~mustahol get~~
~~mustaholsave get~~ (to save data in mongo db)

after getting response from it
now it should hit this api endpoint

~~mustahol gene~~
~~mustahol car~~
~~mustahol pdf get~~ (to generate pdf)
~~mustahol generate pdf get~~ & open it

after that
call the next function

~~mustahol upload pdf to~~

upload pdf to cloudinary
& get URL & update
the cloudinary URL
(pdf link)

- generated pdf should be in single page.
~~if~~ even if user enters 15 product description also
- And let's say if ~~user~~ ^{lots of} user enters ~~more than~~ product & now there is diffcult to includes all these content in a single page & in that case only use you ~~can~~ pdf can split into two pages but make sure even if pdf is splitting into two pages it should not look like ugly but well formatted & well structured.
- ~~logo~~ don't bother about logo empty field i will add it later.

- ~~you can~~ here is the rough skeleton of the generated pdf take a reference from it & make well structured pdf (formal pdf)

- make sure ~~pdf~~ generated pdf should well structured well format do not overflowing all font size should be proper

- ~~As you can see~~ in the shared image ~~where~~ you see some of the field ~~are blank~~ like invoice no., invoice date, client name. Address & ~~some~~ some other things you have to fetch from database.

- you can see there two ~~qr~~ code one for verification ~~one for~~ for verification which you are fetching from database. & one for payment for this pay you leave the image space later i will add qr code of my up!

→ Form 1

amount payment with QR code will come
on the click of the amount will be
redirected link & amount already
entered amount. depending upon the
bill sum
